

Who should attend? Private & public facility operators, aquatic managers, supervisors, facility and property managers, pool service companies.

CPO PLUS – This course goes beyond the traditional CPO course training. Preventative maintenance procedures & tips and solutions to common problems are included throughout the course to help you keep your facilities operating with as little down time as possible with the safest environment in mind.

General Course Outline

Mechanical Room: pumps, filters & heaters

Pool & Spa Chemistry: basic chemistry, chemical costs, types, cost & effects, manual & automated control, water balance, water testing & test kits

Facility Maintenance & Operation: automation, maintenance & troubleshooting

Codes & Regulations: national, state & local

Chemical Safety: personal considerations & emergency procedures

Energy Considerations: reduction in costs, blankets & heaters

Featuring: Field Experience, Troubleshooting & Technological Advances

Instructor:

Steve Dunn has over 13 years of experience with pools and spas. Steve has a degree in Business Administration. He has a facility management background with YMCA experience. Steve has held a CPO certificate for over 10 years. Steve is currently the Vice President of Sales for Commercial Pool Systems, Inc., a company which provides commercial pool & spa equipment, chemicals, water quality, training & consulting. Through his field & management experience Steve will bring practical field experience in addition to technological knowledge.
